## PROFILE

Senior Software Engineer with 7+ years of experience building backend applications, REST APIs, and enterprise integrations using .NET and Azure. Experienced in developing secure and scalable services using Azure Functions, Service Bus, API Management, and Azure DevOps.

I have worked on applications in Healthcare, Finance, and Logistics, with a focus on API development, system integrations, cloud-based services, observability, and maintainable application architecture. I also have experience working with Angular and TypeScript for frontend development and API integration.

## CORE SKILLS

- .NET / Backend: .NET Core 6/7/8, ASP.NET Core, C#, ASP.NET Web API, REST API, Microservices, EF, LINQ
- DevOps: Azure DevOps, CI/CD Pipelines, ARM Templates, Git
- Cloud: Azure (Functions, Service Bus, APIM, ADF, App Services, Blob Storage), AWS, Docker
- Database: SQL Server, query optimisation, schema design, LINQ
- Frontend: Angular (proficient), React, JavaScript, TypeScript, REST API consumption
- Observability: Application Insights, Structured Logging, Retry & DLQ Patterns
- Security: OAuth2, JWT, Azure Entra ID, Azure Key Vault
- Patterns: Event-Driven Architecture, API-Led Integration, CQRS

---

## PROFESSIONAL EXPERIENCE

### Acelucid Technologies Private Limited

Nov 2021 – Present

#### **Software Engineer I → Software Engineer II | Healthcare Support System**

Apr 2023 – Present

*Stack: .NET Core 6–8 · Azure Functions · Service Bus · APIM · Azure AD · Key Vault · Application Insights · ETL*

- Designed and delivered REST APIs on Azure, secured via Azure API Management with OAuth2/JWT and Azure Entra ID for centralised governance and versioning.
- Built event-driven integrations using Azure Functions & Service Bus, dead-letter handling, retry mechanisms, and correlation ID based structured logging.
- Managed secrets across all environments with Azure Key Vault; contributed to orchestration workflows and production incident response.
- Improved system reliability and observability using Application Insights dashboards and structured logging.
- Collaborated with product owners, QA, and clinical stakeholders to translate business requirements into technical specifications, ensuring API contracts met healthcare compliance and data-privacy needs.
- Built and maintained ETL pipelines to move and transform data across integrated systems, ensuring consistency for downstream reporting and analytics.
- Conducted code reviews and mentored junior engineers on .NET best practices, unit testing, and clean architecture; participated in sprint planning and backlog grooming.

#### **Software Engineer I | Warehouse Management System**

Nov 2021 – Apr 2023

*Stack: .NET Core · Azure DevOps · REST APIs · Azure Resource Groups · CI/CD Pipelines*

- Built cloud-based backend services supporting inventory and operations workflows across a distributed warehouse environment.
- Implemented CI/CD pipelines and release management via Azure DevOps to ensure consistent, repeatable deployments.
- Collaborated with QA and business stakeholders to define acceptance criteria and validate warehouse operations workflows against real-world scenarios.
- Provisioned and configured Azure Resource Groups to support environment isolation across dev, test, and production; wrote unit and integration tests to reduce regression defects.

### Eureka Outsourcing Solutions Private Limited

Apr 2021 – Oct 2021

*Stack: .NET Core · Entity Framework · LINQ · SQL Server*

- Designed and built REST APIs using Entity Framework and LINQ for a brokerage firm, supporting trade and account data integration.
- Built high-volume backend APIs and ticket lifecycle integration workflows for a brokerage support platform.

### **Aurum E-Serve LLP**

**Jun 2019 – Mar 2021**

*Stack: .NET Core · ASP.NET Web API · SQL Server · LINQ · Azure*

- Built and maintained an internal IT ticketing tool used for issue tracking and support workflow automation, deployed and hosted on Azure App Services.
- Integrated third-party payment gateways into internal platforms, handling transaction processing, reconciliation, and error handling.
- Optimised SQL Server schemas and LINQ queries for throughput; implemented centralised logging and exception handling.

### **EDUCATION**

**B.C.A - Dewan Institute of Management Studies**

**2016 – 2019**
