

ANMOL TITORIYA

.NET Engineer | Azure | Angular/React

India | 7 Years Experience | Healthcare · Finance · Logistics | [Portfolio](#) | [LinkedIn](#)

PROFILE

Senior Software Engineer with 7+ years specialising in .NET Core and enterprise API development. Deep expertise in designing scalable, event-driven and API-led integration solutions using Azure Functions, Service Bus, API Management, and Data Factory. Strong track record in regulated industries (Healthcare, Finance, Logistics) with hands-on delivery of secure, observable, production-grade systems.

CORE SKILLS

- .NET / Backend: .NET Core 6/7/8, ASP.NET Web API, Microservices, EF, LINQ
- DevOps: Azure DevOps, CI/CD Pipelines, ARM Templates, Git
- Azure Integration: Functions, Service Bus, APIM, ADF, App Services, Blob Storage
- Database: SQL Server, query optimisation, schema design, LINQ
- Frontend: Angular (proficient), TypeScript, REST API consumption
- Observability: Application Insights, Structured Logging, Retry & DLQ Patterns
- Security: OAuth2, JWT, Azure Entra ID, Azure Key Vault
- Patterns: Event-Driven Architecture, API-Led Integration, CQRS

PROFESSIONAL EXPERIENCE

Backend Engineer | Healthcare Support System

Apr 2023 – Aug 2026

Stack: .NET Core 6–8 · Azure Functions · Service Bus · APIM · Azure AD · Key Vault · Application Insights · ETL

- Designed and delivered REST APIs on Azure, secured via Azure API Management with OAuth2/JWT and Azure Entra ID for centralised governance and versioning.
- Built event-driven integrations using Azure Functions & Service Bus, dead-letter handling, retry mechanisms, and correlation ID based structured logging.
- Managed secrets across all environments with Azure Key Vault; contributed to orchestration workflows and production incident response.
- Improved system reliability and observability using Application Insights dashboards and structured logging.

Software Developer | Warehouse Management System

Oct 2022 – Apr 2023

Stack: .NET Core · Azure DevOps · REST APIs · Azure Resource Groups · CI/CD Pipelines

- Built cloud-based backend services supporting inventory and operations workflows across a distributed warehouse environment.
- Implemented CI/CD pipelines and release management via Azure DevOps to ensure consistent, repeatable deployments.

Software Developer | Support Ticketing System

Jun 2019 – Oct 2021

Stack: .NET Core · ASP.NET Web API · Entity Framework · SQL Server · LINQ

- Built high-volume backend APIs and ticket lifecycle integration workflows for a brokerage support platform.
- Optimised SQL Server schemas and LINQ queries for throughput; implemented centralised logging and exception handling.
